If you don't have experience with DVD-R discs please check your player's compatibility at www.videohelp.com in the "Players" section.

If you are considering over 100 duplicates of a disc, we will recommend that you investigate having your disc replicated rather than duplicated and can refer you to a replication service.

DVD-R & CDR - Details & Options

We use high-quality Taiyo-Yuden DVD-R and CDR media and apply a durable, smudge-free thermal printing directly to the disc. We don't offer fancy, full-color packaging, choosing instead to offer simple and durable thermal text printing for your discs. We never use paper labels which will cause DVDs to be unreadable by many DVD players and computer drives.

-> Disc Printing (Labeling):

We will elegantly layout the text you specify for your DVDs or CDs at no additional cost. We do not offer color printing or photographic reproduction on your disc labels.

-> Packaging:

Paper window sleeves that allow the printing on the disc to be read through the window are included at no additional cost. While we do not offer any "retail-ready" packaging, we can refer you to businesses that can provide replication, color printing, packaging, etc.

-> DVD Cases (single disc): 1 - 14 : \$0.79/each 15+ : \$0.55/each
(multi-disc cases available at additional cost)

NOTE: Copyrighted programs will not be copied, converted or duplicated.
